

# HIV Continuum of Care in Virginia, Ryan White Part B Clients 2023

Prepared by: Division of Disease Prevention,  
HIV Care Services Unit  
Virginia Department of Health  
July 2024

# Defining the HIV Continuum of Care in Virginia

*What's considered a care marker?*

\*For Ryan White clients to be eligible for Retention in Care, they must NOT be deceased, and they must have a caremarker within the timeframe. This includes VL labs, CD4 labs, and medical care visits.

\*\*For Ryan White clients to be eligible for Viral Load Suppression, they must have an outpatient ambulatory caremarker within the timeframe. This includes VL labs, CD4 Labs, and medical care visits.

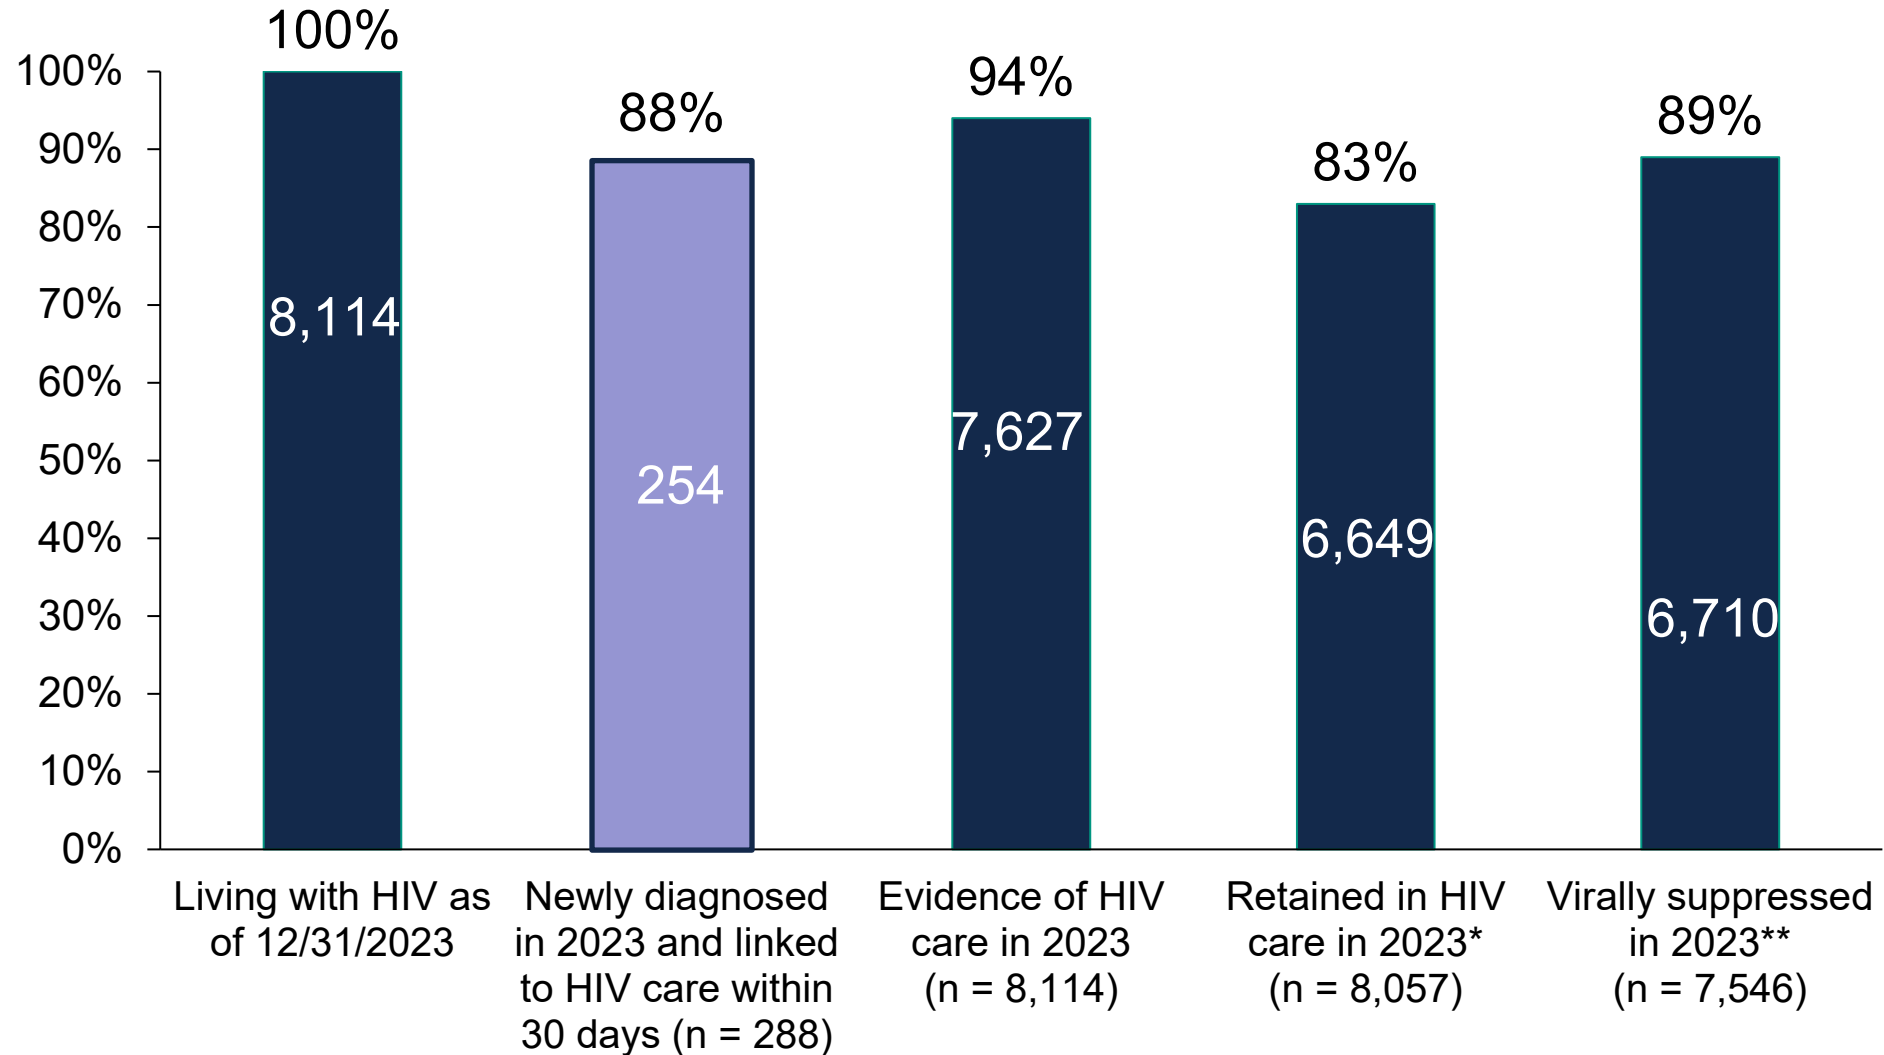

# Calculating the HIV Care Continuum Measures for Ryan White Part B (RWHAP B) Clients in Virginia (2023)

Measure	Numerator	Denominator	Overall Measure (%)
Linkage to HIV care within 30 days	Number of Ryan White Part B clients in the denominator who were linked to care within 30 days of their new diagnosis date within the 12-month measurement period.	Number of Ryan White Part B clients with a new HIV diagnosis during the 12-month measurement period.	$=(\text{Numerator/Denominator}) \times 100$ $=254/288 \times 100$ $=88\%$
Retention in care*	Number of Ryan White Part B clients in the denominator who had at least two care markers, that are at least 90 days apart, during the 12-month measurement period.	Number of Ryan White Part B clients, who are not deceased, and who have received at least one care marker during the 12-month measurement period.	$=(\text{Numerator/Denominator}) \times 100$ $=6,649/8,057 \times 100$ $=83\%$
Viral load suppression**	Number of Ryan White Part B clients in the denominator, with an HIV viral load less than 200 copies/mL at last HIV viral load test during the 12-month measurement period.	Number of Ryan White Part B clients who received at least 1 outpatient ambulatory care marker during the 12-month measurement period.	$=(\text{Numerator/Denominator}) \times 100$ $=6,710/7,546 \times 100$ $=89\%$

\*For Ryan White clients to be eligible for Retention in Care, they must NOT be deceased, and they must have a caremarker within the timeframe. This includes VL labs, CD4 labs, and medical care visits.

\*\*For Ryan White clients to be eligible for Viral Load Suppression, they must have an outpatient ambulatory caremarker within the timeframe. This includes VL labs, CD4 Labs, and medical care visits.

# HIV Continuum of Care in Virginia for Ryan White Part B (RWHAP B) Clients, 2023 (n = 8,114)

\*For Ryan White clients to be eligible for Retention in Care, they must NOT be deceased, and they must have a caremarker within the timeframe.

This includes VL labs, CD4 labs, and medical care visits.

\*\*For Ryan White clients to be eligible for Viral Load Suppression, they must have an outpatient ambulatory caremarker within the timeframe. This includes VL labs, CD4 Labs, and medical care visits.

# HIV Continuum of Care For All Virginia & RWHAP B Clients in Virginia, 2023

\*For Ryan White clients to be eligible for Retention in Care, they must NOT be deceased, and they must have a caremarker within the timeframe. This includes VL labs, CD4 labs, and medical care visits.

\*\*For Ryan White clients to be eligible for Viral Load Suppression, they must have an outpatient ambulatory caremarker within the timeframe. This includes VL labs, CD4 Labs, and medical care visits.

# Demographic Summary of Ryan White Part B Clients (2023)

## (n = 8,114)

### Age

### Race

Black or African American (Non-Hispanic)	4,429	54.58%
White (Non-Hispanic)	2,047	25.23%
Hispanic or Latino	1,310	16.14%
Asian (Non-Hispanic)	157	1.93%
More than 1 Race (Non-Hispanic)	79	0.97%
Unknown	62	0.76%
American Indian/Alaska Native (Non-Hispanic)	22	0.27%
Native Hawaiian/Pacific Islander (Non-Hispanic)	8	0.10%
Grand Total	8,114	100.00%

### Gender

### Transmission Risk

Heterosexual Contact	n =2,915 (35.93%)
IDU	n =107 (1.32%)
IDU & MSM	n =69 (0.85%)
MSM	n =2,997 (36.94%)
All Other Transmission Risks	n =2,026 (24.97%)

### Housing Status

### Service Region

Northwest	n =1,088 (13.41%)
Northern	n =1,184 (14.59%)
Southwest	n =796 (9.81%)
Central	n =4,745 (58.48%)
Eastern	n =301 (3.71%)

# VIRAL LOAD SUPPRESSION\* BY DEMOGRAPHICS

\*Viral Load Suppression requires at least one caremarker in the measurement timeframe to be considered eligible. The number of eligible RWHAP B clients for this measure is (n = 7,546).

# Demographic Summary of Ryan White Part B Clients Eligible for Viral Load Suppression Performance Measure (2023) (n =7,546)

## Age

## Race

Black or African American (Non-Hispanic)	4,105	54.40%
White (Non-Hispanic)	1,919	25.43%
Hispanic or Latino	1,232	16.33%
Asian (Non-Hispanic)	149	1.97%
More than 1 Race (Non-Hispanic)	70	0.93%
Unknown	44	0.58%
American Indian/Alaska Native (Non-Hispanic)	20	0.27%
Native Hawaiian/Pacific Islander (Non-Hispanic)	7	0.09%
Grand Total	7,546	100.00%

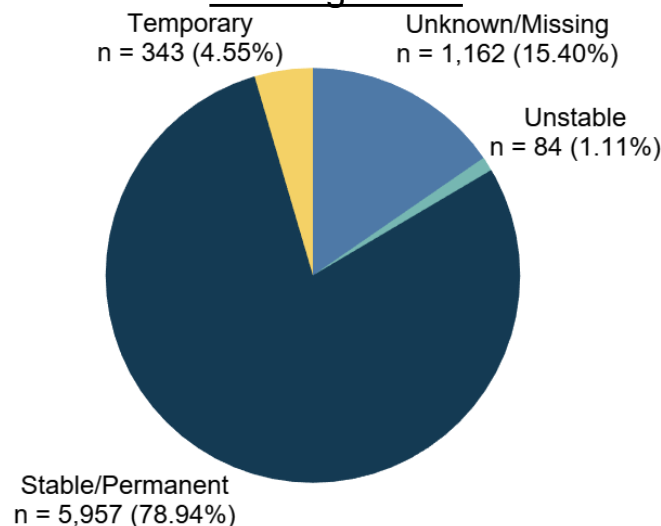

## Gender

## Transmission Risk

Heterosexual Contact	n =2,769 (36.69%)
IDU	n =99 (1.31%)
IDU & MSM	n =64 (0.85%)
MSM	n =2,808 (37.21%)
All Other Transmission Risks	n =1,806 (23.93%)

## Housing Status

## Service Region

Northwest	n =1,088 (13.41%)
Northern	n =1,184 (14.59%)
Southwest	n =796 (9.81%)
Central	n =4,745 (58.48%)
Eastern	n =301 (3.71%)

# Ryan White Part B Viral Load Suppression by Race/Ethnicity in Virginia, 2023 (n = 7,546)

In accordance with the HRSA Ryan White Compass Dashboard and its focus on priority populations, historically disenfranchised racial identities have been highlighted in yellow to showcase possible health inequities in performance measure outcomes.

# Ryan White Part B Viral Load Suppression by Gender in Virginia, 2023 (n = 7,546)

The current gender identity is presented above, NOT the birth sex of the clients. Current gender identity is NOT a required item for clients to disclose to receive services.

# Ryan White Part B Viral Load Suppression by Transmission Risk in Virginia, 2023 (n = 7,546)

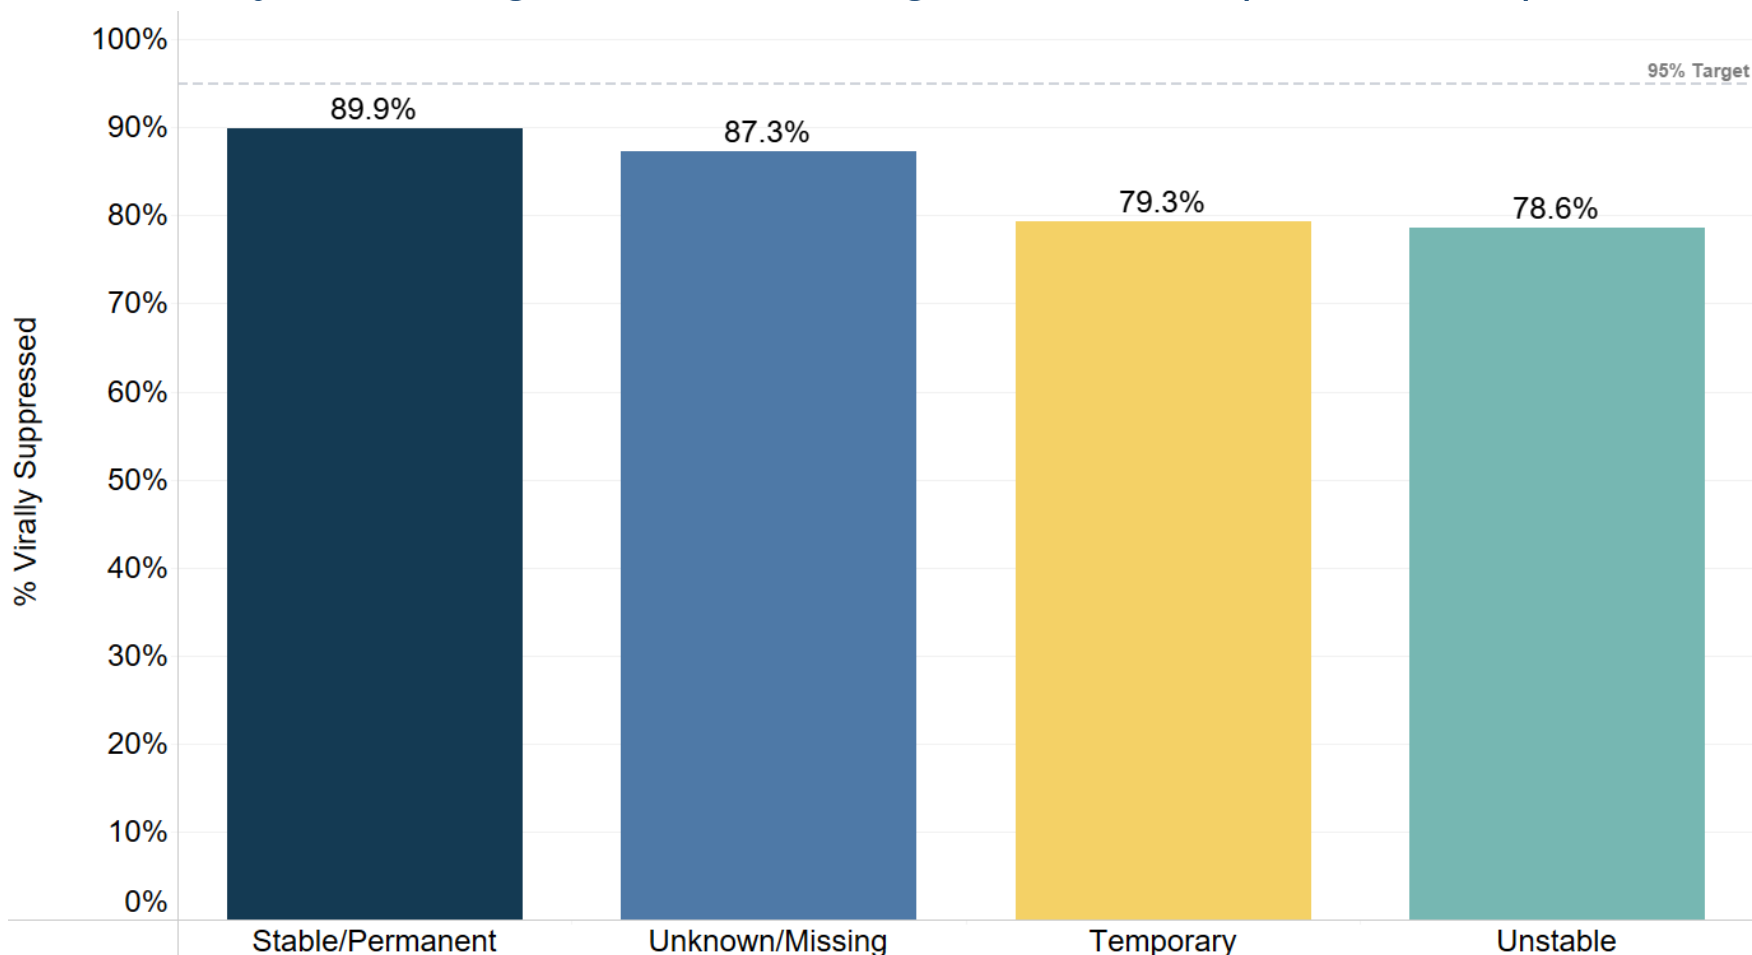

In accordance with the HRSA Ryan White Compass Dashboard and its focus on priority populations, common risk factors of interest, Intravenous Drug Use (IDU) and Men who have Sex with Men (MSM) are highlighted here in yellow.

# Ryan White Part B Viral Load Suppression by Age in Virginia, 2023 (n = 7,546)

In accordance with the VDH HIV & Aging Pilot Project, the population of those aging with HIV (in this case, 45+) are highlighted in yellow.

## Ryan White Part B Viral Load Suppression by Housing Status in Virginia, 2023 (n = 7,546)

While proof of VA residency is required, collecting the type of housing status is NOT required for client registration. The HCS data team is working diligently to lower the number of RWHAP B clients whose housing status is unknown/missing.

# Ryan White Part B Viral Load Suppression by Service Region in Virginia, 2023 (n = 7,546)

# RETENTION IN CARE\* BY DEMOGRAPHICS

\*Retention in Care requires the client being NOT deceased and having at least one caremarker in the measurement timeframe to be considered eligible. The number of eligible RWHAP B clients for this measure is (n = 8,057).

# Demographic Summary of Ryan White Part B Clients Eligible for Retention in Care Performance Measure (2023) (n = 8,057)

## Age

## Race

Black or African American (Non-Hispanic)	4,403	54.65%
White (Non-Hispanic)	2,024	25.12%
Hispanic or Latino	1,305	16.20%
Asian (Non-Hispanic)	157	1.95%
More than 1 Race (Non-Hispanic)	76	0.94%
Unknown	62	0.77%
American Indian/Alaska Native (Non-Hispanic)	22	0.27%
