### Introduction

#### What is VERIP?

The Virginia Electronic Registration for Immunization Programs (VERIP) is a web-based registration system for the Division of Immunization (DOI). Providers must complete a registration in VERIP before access to VIIS is granted. The VERIP registration must be renewed annually in order to maintain VIIS access.

#### What is VIIS?

The Virginia Immunization Information System (VIIS) is a confidential, web-based immunization registry for the state of Virginia. VIIS is able to perform a variety of functions for health care providers, which includes the following:

- Maintain computerized immunization records on all patients
- Record immunizations, contraindications, and reactions on patient records
- Validate immunization histories and provide immunization recommendations
- Produce reminder recall notices when patients are due or overdue for immunizations
- Generate vaccine usage and client reports
- Manage vaccine inventory

All providers that utilize VIIS are required to register in VERIP and sign the security agreements. Registration renewals in VERIP are required annually. Providers are required to attend a VIIS training session before login credentials are given.

## Glossary of Terms

---

---

### Glossary

Below you will find terms that are used within the manual.

**VFC/VFA:** VFC/VFA is Vaccines for Children/Vaccines for Adults (programs)

**VIIS Code:** Code is the Virginia Immunization Information System Organization Code

**VFC/VFA Pin:** Provider Identification Number

**VTRCKS:** Vaccine Tracking System

**LHD:** Local Health Department

**VERIP:** Virginia Electronic Registration for Immunization Programs (VERIP)

**Lot#:** A lot number is an identification number assigned to a particular quantity or lot of material from a single manufacturer.

**NDC Code:** National Drug Code a unique 10-digit, 3-segment number

**CPT Code:** Code is Current Procedural Terminology code. (CPT®) codes offer doctors and health care professionals a uniform language for coding medical services and procedures to streamline reporting, increase accuracy and efficiency.

**Wastage:** Hazardous vaccine (open vials, broken vials, attached needles) should be reported but not returned (no return label needed).

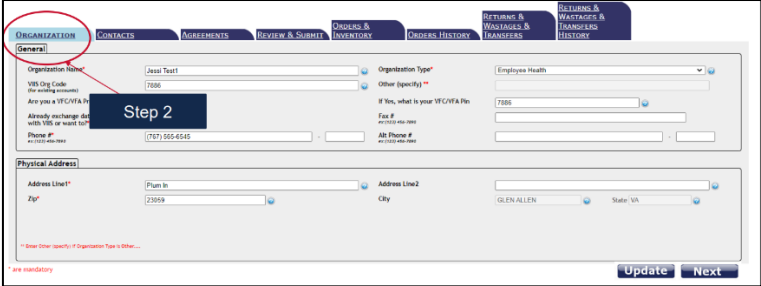

**Return:** Non-hazardous vaccine that is expired or spoiled and can be returned for excise tax credit (will generate a return label)

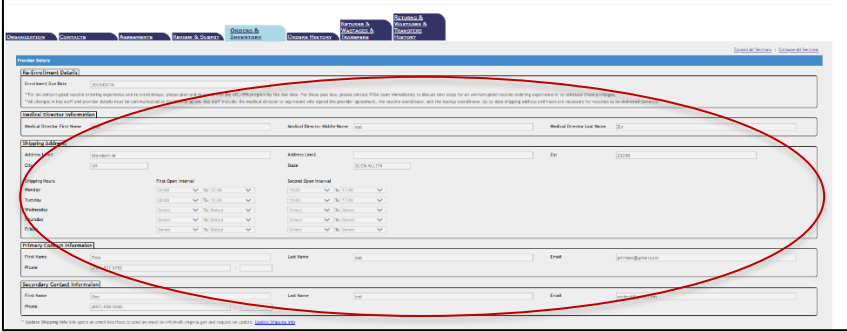

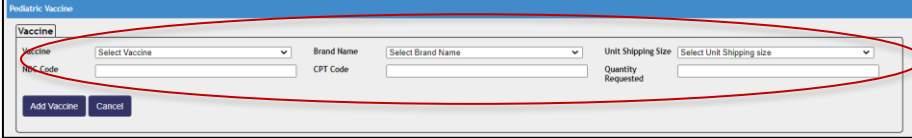

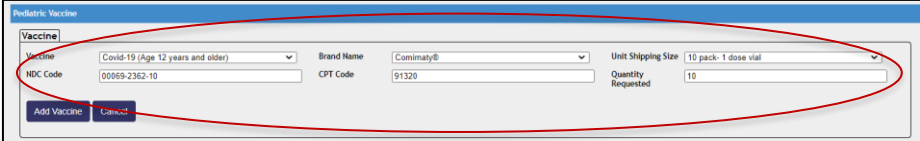

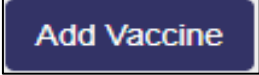

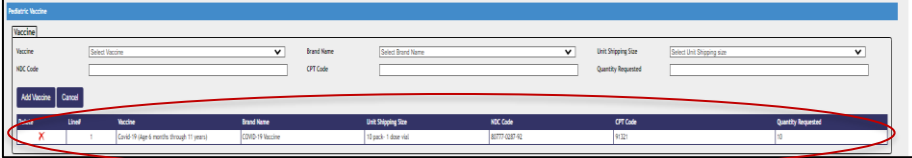

**Transfer:** Vaccine that one VFC/VFA provider is moving/transferring to another VFC/VFA provider.
