

Organizational Structure Report

August 1, 2024

Overview

The Virginia Department of Health's (VDH) mission is to protect the health and promote the well-being of all people in Virginia, with the vision of being the healthiest state in the nation. The agency values a culture of service, equity and data driven decisions. VDH is comprised of a statewide Central Office in Richmond and 35 health districts, three of which are locally administered.

The VDH maintains five core strategic goals:

- Maintain a competent and valued workforce;
- Foster healthy, connected, and resilient communities;
- Be a trusted source of public health information and services;
- Assure the conditions that improve health opportunity; and
- Provide internal systems that deliver consistent and responsive support.

The VDH is led by a State Health Commissioner appointed by the Governor of Virginia. The Health Commissioner oversees the direction of the agency and provides advice and support to the Governor through the Secretary of Health and Human Resources. The Health Commissioner is supported by a Senior Leadership Team (SLT) consisting of a Chief Deputy Commissioner, three Deputy Commissioners, three Assistant Deputy Commissioners, a Chief Operating Officer, a Chief of Staff, a Workforce Development and Engagement Director, and the Director of Public Health Planning and Evaluation. Additional staff on the SLT but not organizationally within the Office of the Commissioner include: the State Epidemiologist and the Chief Information Officer. Collectively, these senior level executives assist with navigating VDH through a complex statewide health landscape while promoting the well-being of all people in Virginia.

Structure and Responsibilities

Programs within VDH are administered by Offices and health districts which report through Deputy Commissioners to the Health Commissioner. There are four deputy areas: Administration, Community Health Services, Population Health and Preparedness, and Governmental and Regulatory Affairs.

Administration

- The Deputy area referred to as Administration oversees the financial and operational backbone of the agency. Five offices comprised Administration

throughout the majority of this operational year, each supporting the agency mission by conducting core administrative functions in support of cross-agency programs.

- The [Office of Financial Management](#) oversees the accounting and financial duties needed to maintain VDH Offices and health districts.
- The [Office of Human Resources](#) facilitates hiring and employee relations for VDH's statewide Central Office in Richmond and the 32 state administered LHDs.
- The [Office of Information Management](#) manages the information technology (IT) needs of staff at the Central Office and LHDs. This office also houses the Center for Public Health Informatics, which supports programs through the provision of expertise in the development, translation, visualization, and dissemination of public health data and informatics knowledge to improve population health outcomes through innovative and improved use and understanding of data to better inform and promote the health of all Virginians.
- The [Office of Procurement & General Services](#) coordinates the purchasing and distribution of non-IT equipment and supplies used by staff of the Central Office and health districts, as well as agency oversight of the James Madison building.
- The [Office of Vital Records](#) consolidates and maintains information related to significant life events, including, but not limited to, births, deaths, marriages, and divorces.

Community Health Services

The Deputy area referred to as Community Health Services oversees the health districts located across Virginia. There are 35 health districts statewide. Three districts are locally administered: Fairfax, Arlington and Loudoun. The remaining 32 districts are administered by the state. Twelve districts are currently combined to form 6 districts: Lenowisco and Cumberland Plateau, Pittsylvania/Danville and Southside, Peninsula and Hampton, Roanoke and Alleghany, Richmond and Henrico, and Central Virginia and West Piedmont. The remaining 20 districts are not combined and operate as single district entities.

Organizing public health services into districts allows the state's public health needs to be managed at a community level by individuals knowledgeable about local populations. Each district is unique but has a similar structure, with operations overseen by a district director. Combined districts are jointly managed on a long-term basis by a single district director.

The Code of Virginia was changed on July 1, 2022 to allow non-physicians to serve as district directors. If the district director is not a licensed physician, they are supported by

a licensed medical officer to help manage clinical services. As of August 1, 2024, VDH has hired seven non-physician district directors for the following districts: Eastern Shore, Mount Rogers, Lenowisco-Cumberland Plateau, Lord Fairfax, Three Rivers, Blue Ridge, and Western Tidewater.

All health districts have traditional service areas: Environmental Health, Epidemiology, Business Operations, Human Resources, and Clinical Services. In addition, each district has an individual serving as an Emergency Preparedness Coordinator. Some districts have Population or Community Health teams. The districts interact with the public in the day-to-day actions of public health, providing services such as vaccinations, disease contact tracing, and restaurant inspections. Community Health Services also contains a centralized operations office, with staff who assist districts through the provision of assistance and standardized processes for client services.

Governmental and Regulatory Affairs

The Deputy area referred to as Governmental and Regulatory Affairs oversees and advises the Health Commissioner on matters related to policy, legislative, and regulatory issues. This deputy area coordinates VDH's responsibilities involving General Assembly sessions and legislative liaising, including oversight, preparation and review of draft bills, and submitting legislative action summaries and enrolled bill reviews. This deputy area coordinates VDH responsibilities involving the state regulatory process, including conducting periodic reviews of regulations, and developing regulatory actions for consideration by the State Board of Health. Additional responsibilities of this deputy area include administration of the State Board of Health, HIPAA compliance, records management, language access, and constituent mail response. The Deputy Commissioner for Governmental and Regulatory Affairs also oversees two offices, and one program:

- The [Office of Communications](#) produces the press releases, bulletins and multimedia necessary to effectively communicate VDH priorities, needs and procedures. This office also coordinates VDH responses to FOIA requests.
- The [Office of Licensure and Certification](#) works to ensure the quality of healthcare delivered by providers is safe, cost effective, and compliant with state and federal laws.
- The [Public Health Planning & Evaluation](#) program provides support for VDH strategic planning and performance measurement processes.
- The VDH Institutional Review Board (IRB) coordinates research-related activities that involves agency data. This may be in coordination with VDH Offices, LHDs, institutions of higher education or combinations thereof.

Population Health and Preparedness

The Deputy area referred to as Population Health and Preparedness oversees the nine programmatic offices predominately located in the VDH Central Office in Richmond, VA. These nine offices consist of the following:

- The **Office of Drinking Water** protects public health by ensuring Virginians have a safe and adequate supply of drinking water.
- The **Office of Emergency Medical Services** plans and coordinates effective and efficient statewide Emergency Medical Services.
- The **Office of Emergency Preparedness** facilitates the agency's response to emergencies impacting public health through preparation, collaboration, education and rapid intervention.
- The **Office of Environmental Health Services** protects public health by preventing the transmission of diseases through food, milk, shellfish, water, and sewage and partners with other agencies to protect the environment.
- The **Office of Epidemiology** protects public health and improves well-being by preventing and controlling endemic and emerging infectious diseases. The director of this office also serves as the State Epidemiologist.
- The **Office of Family Health Services (OFHS)** improves well-being for all Virginians by strengthening the health of families and communities, with a focus on programs that encourage child and family health, prevention and health promotion, including cancer prevention, and nutrition.
- The **Office of Health Equity** ensures that a health equity lens is applied to all VDH programs and areas, ensuring that vulnerable populations are supported. The OHE also houses the federally funded Office of Rural Health and multicultural engagement activities.
- The **Office of the Chief Medical Examiner (OCME)** works with multiple state and local entities and determines the cause and manner of deaths that occur under certain circumstances in Virginia. The OCME also manages the statewide anatomical program.
- The **Office of Radiological Health** protects the public from unnecessary radiation exposure caused by a wide spectrum of applications used in the healing arts, research, educational institutions and industry.

Organizational Changes

As a large and complex agency, VDH undergoes routine organizational changes to ensure continual internal and external needs and expectations are met. Recent Commissioner's Office and other key Central Office changes include the following:

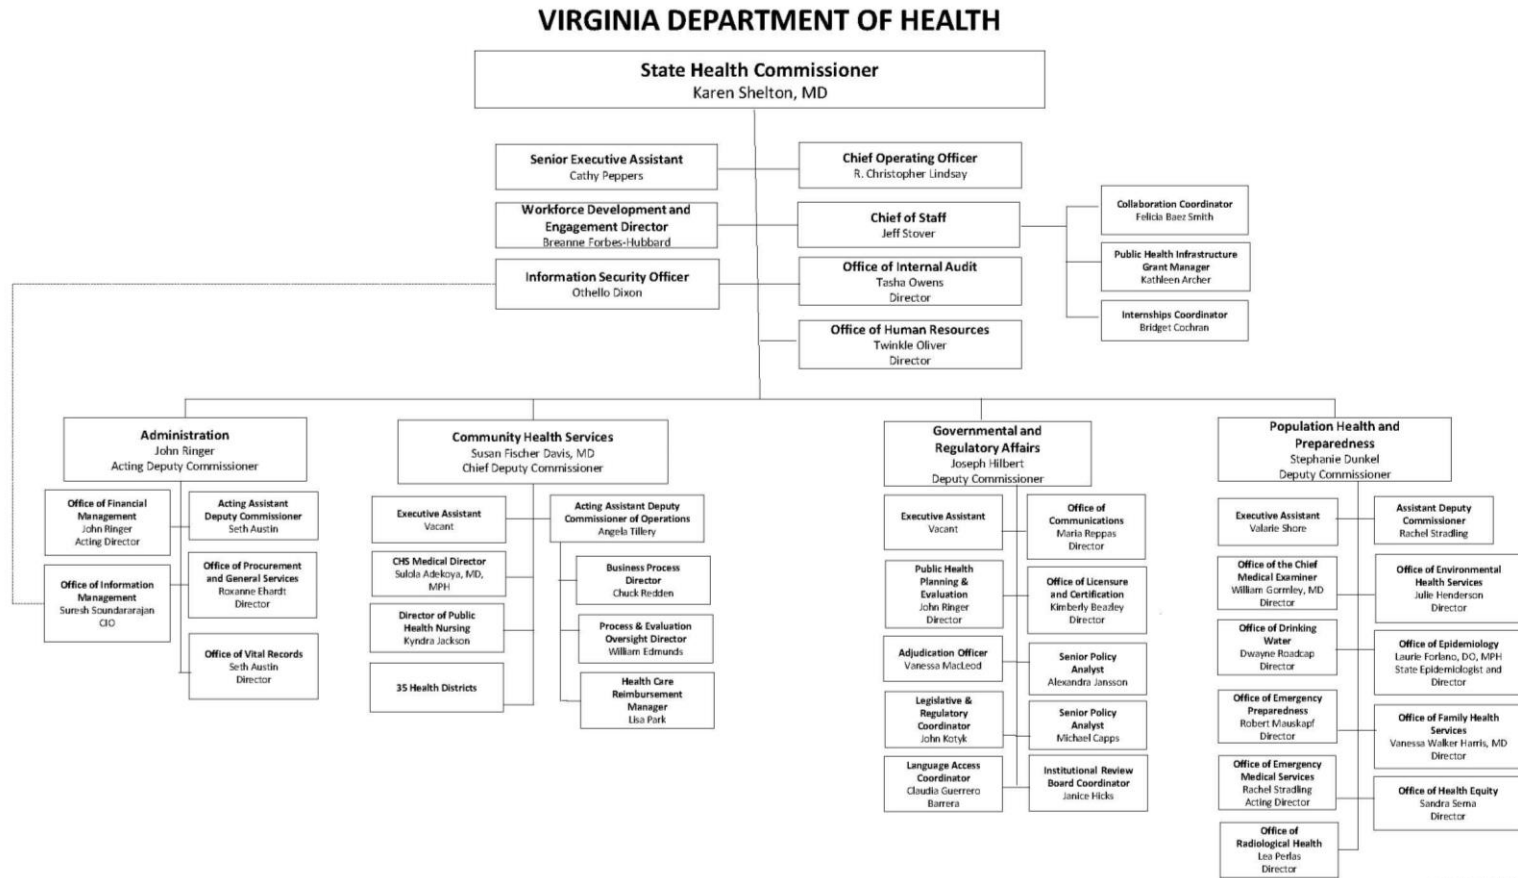

- The Deputy Commissioner area of Administration has continued the process of realigning staff within its offices, including the Office of Procurement and General Services, and the Office of Financial Management. Relevant business management and human resources staff have been redeployed back to relevant offices and LHDs to enhance organizational support and improve ties with subject matter experts in programs.
- In May 2024, the Office of Human Resources officially moved under the direct supervision of the Health Commissioner.
- The Assistant Deputy Commissioner for Administration position was vacated in May 2024; the Office of Vital Records Director is currently serving in an acting role in this position.
- The Chief Deputy Commissioner for Community Health Services (CHS) was successfully filled in January 2024.
- The Assistant Deputy Commissioner CHS, who assumed a LHD Director position in July 2023, has continued to serve in an acting capacity as the Assistant Deputy Commissioner while this position is recruited.
- The Assistant Deputy Commissioner for Population Health and Preparedness position was filled in August 2023.
- The Deputy Commissioner for Population Health and Preparedness position was vacated due to a retirement in April 2024. The Assistant Deputy Commissioner for this programmatic area served in an acting capacity while the position was recruited/filled (through August 9, 2024).
- The Deputy Commissioner for Administration position was vacated in July 2024. The Director of Public Health Planning and Evaluation is serving in an acting capacity. This position will be reorganized into a Chief Financial Officer position.
- The Center for Community Health Improvement, previously in the Office of Epidemiology, was moved to OFHS in July 2024. This change occurred to ensure consolidation of related staffing and activities, which was previously split between offices. This center supports state and local collaboration to identify priority public health issues and develops interventions that lead to measurable health improvement.
- The Chief Diversity, Equity and Inclusion (DEI) Officer position, vacated in 2023, has not been refilled. Instead, a new Workforce Development and Engagement Director position was created and filled in March 2024. This position was a funding requirement of the Centers for Disease Control and Prevention's Public Health Infrastructure Grant (PHIG). This position reports directly to the Health Commissioner and continues to provide DEI support for the agency, as well as direction related to workforce development and engagement activities.

- A Grants Manager for PHIG was hired in June 2024. This position reports directly to the Chief of Staff, who serves as the PHIG Principal Investigator/Project Director. This position is responsible for managing the administrative functions of PHIG, including all budgets and work plans, as well as financial tracking, contracts and administrative communications with impacted internal and external partners.
- The Chief Information Security Officer position was vacated in January 2024. This position was subsequently filled in July 2024.
- A new Legislative & Regulatory Coordinator position was hired in October 2023.
